

Case Study: Proactive Care with Arquella's Continuous Monitoring Solutions

Family-run Group of Nursing
Homes Enhances Resident
Safety and Care with
Arquella's Full Solution.

AT A GLANCE

Challenges

- Ensure Resident Safety
- Fall Prevention
- Quick Emergency Response

Solution

- Arquella Sense
- Arquella Move

Benefits

- Enhanced Safety
- Improved Response Times
- Informed Care Decisions

“While we strive to prevent every fall, some may still occur.

That's where Arquella Sense shines—its advanced fall detection capabilities instantly recognise when a fall happens and in real time alerts our caregivers.”

Objectives

The main challenge was to **enhance the quality of life and safety for residents** in the care home. The solution needed to be comprehensive, forward-thinking and allow for proactive care. This required finding a vendor who offered location sensing technology, fall prevention and rapid response capabilities.

Solution

Partnering with Arquella, the care home implemented Arquella Call, Arquella Connect along with:

Arquella Sense - Discreet sensors to monitor resident movement, identifying potential fall risks and alerting caregivers in real-time.

Arquella Move - Ultra Wideband technology which tracks the location of staff, residents and assets throughout the home, identifying dependency rate data and timely responses to residents' needs.

Benefits

Enhanced Resident Safety

The proactive fall prevention system has seen significant reduction in falls and an increase in proactive assistance.

Improved Response Times

The integration with the advanced nurse call system has contributed to faster response times, minimising injury and distress.

Informed Care Decisions

With the data and behaviour insights, provided by Arquella, the ability to identify early signs of health issues has been improved.

Family Reassurance

Families are reassured knowing that their loved ones have 24/7 care and are safeguarded.
